## ABOUT ME

Fullstack Drupal developer at VML. 15+ years of diverse software engineering experience with specialties in frontend development, infrastructure operation, and problem solving.

Skilled life-long student with an entrepreneurial view, my goal is always to create value by generating intelligent solutions that fulfill customer's needs. I like challenging situations that require the use of multiple skills and critical thinking. Usually spending time learning new technologies and tools.

## EXPERIENCE

### WUNDERMAN THOMPSON TECH / VML

#### Backend Engineer - *Drupal, PHP, Vue*

January 2022 - Current

Fullstack Drupal / Backend Engineer.

Worked in big drupal projects like FitnessFirst and AB-INBEV.

Built Acquia DAM image cropper, a drupal module to help the customer's experience curating images and 'translates' their ideas into DAM's queries.

Lead the development of a multipage webform that functions as the primary source of new subscriptions for the company. It has lots of custom components, custom themes, and integrated external API.

### POSSIBLE / WUNDERMAN THOMPSON TECH

#### Frontend Engineer - *Angular, React, Drupal*

January 2021 - Current

Several projects for clients like Siemens and DWS.

Implemented a game using CreateJS for SporTV.

Worked on standalone projects for corporate training using Scorm.

SSO configuration with AzureAD in Symfony 3.

Built some mobile apps with cordova.

## OCTION

### Co-Founder & Game Developer – *Unity3D(C#), Angular, Python, PHP, MySQL*

February 2014 – August 2016

Created products aimed at corporate training, advergames for business fairs and educational games.

Helped in developing the core teaching paradigm of the company using ideas from Piaget and Popper.

Worked in a project of niche social media with blockchain. The project, unfortunately was shut down because in 2016 crypto was a very controversial topic.

## Banco do Brasil

*PHP, MySQL, VBA*

May 2006 – February 2014

Worked together with engineering and logistics management in Manaus (AM) in the development of a dashboard for cost control in building and renovation projects.

Built several VBA mainframe scrappers for data collecting and filtering for reports and issue identification.

## ABBRA

Developer – *PHP, MySQL*

April 2004 – May 2006

Developed a system that took care of the entire process, from lead and first contact to signed legal contract. Batch research and verification in court databases for more than one million potential clients.
